

You've Been at the Mercy of Two Metabolic Barriers That Controlled Your Ability to Lose Fat...That Ends Now

It's rare that any individual will claim to have a perfect metabolism...one that automatically works to keep you in ideal form. Even if you do everything right to get leaner, you may still struggle with your body fat percentages. Two metabolic factors are behind this problem.

First, is your body's ability to optimally produce thermogenic enzymes, which create heat and burn calories. This condition may have not been a problem in your younger years, but it gets worse as you grow older. If your production of these enzymes is off, the second factor comes into play. When you begin dieting, your metabolism may diminish even further as you reduce calories. Your quest for more fat loss then becomes infinitely more difficult. Fortunately, science has discovered a metabolite, (**7-Keto**[™]) that can boost the necessary enzyme production. Beverly took what science discovered and created **7-Keto**[™] **MuscleLean**, a formula that enables almost anyone to overcome these metabolic roadblocks.

What Is 7-Keto MuscleLean and How Does It Work

MuscleLean is built around **7-Keto**, a derivative of DHEA. Research has proven that it improves the body's output of thermogenic enzymes and up-regulates your metabolic "Set Point". This set point is the level of fat that your body constantly strives to maintain in storage. **7-Keto** has been proven to shift your metabolic set point in favor of a leaner more muscular physique, while keeping your metabolism supercharged. Then we added a powerful antioxidant, Green Tea, for its lipolytic properties, which, in laymen's terms, improves the usage of fat as a fuel source.

Then we added Hoodia from the South African plant *Hoodia Gordonii*. Also added was bromelain, a powerful enzyme from pineapple that supports protein digestion and the thermogenic process. New research (and years of anecdotal evidence) compelled us to add Concentrated Grapefruit Extract. The chemical properties of grapefruit reduce insulin levels and encourage weight loss. The importance of this lies with the hormone's weight management function. While not its primary function, insulin assists with the regulation of fat metabolism. Therefore, the smaller the insulin spike after a meal, the more efficiently the body processes food for use as energy and the less it's stored as fat in the body. To round it all out, we added Guarana, which provides an amplifying, fat melting kick of caffeine. Beverly's **MuscleLean** includes each of these co-factors as well as the breakthrough micronutrient, 7-Keto, all in the correct potency.

Don't Allow Yourself To Be Deceived

Thinking any supplement with the name **7-Keto** on it is the same as **MuscleLean** is a mistake. The difference is huge! **Having the correct potency is VITALLY important.** **7-Keto** is trademarked by Humanetics Corporation, and it's the nickname for 3-acetyl-7-Oxo-Dehydroepiandrosterone, other supplement companies have products that contain **7-Keto**, but on average their potency is **less than 25% of the potency in Beverly's MuscleLean**, (we match the potency used in the **7-Keto** research).

Profit driven supplement companies do this with countless products and then tout them as being effective. Slick advertising focusing on the NAME of an ingredient can divert your focus from the fact that there isn't enough of the ingredient in their product to do a thing for you! It's sad, but it's true.

One major difference that has separated Beverly from the rest, and has for decades, is our staunch refusal to cut corners. We won't use an ingredient unless it's been proven to work, and we only use the highest quality ingredients in the precise potencies, proven to be effective in research.

**Beverly's MuscLean Will Help You Lose Weight from Fat Alone
Not From Water Weight or Loss of Lean Muscle Tissue**

Two randomized, double blind, placebo-controlled, clinical studies demonstrated amazing results from a 200-mg. dose of **7-Keto**. In the first clinical study, **7-Keto** was responsible for three times more weight loss versus placebo, with the weight loss due solely to fat reduction, not water or muscle loss.

The second study confirmed these findings by testing two groups with similar diet and exercise programs. The **7-Keto** group showed a dramatic improvement in body composition, (i.e. fat loss/ muscle retention) in comparison to the placebo group, which reduced weight slightly, due to muscle, water, and fat loss in similar amounts.

Both research groups used 200 mg per day of **7-Keto**, in divided doses. While most products on the commercial market contain less than half this amount, this is the exact dosage contained in two servings of Beverly's MuscLean.

**To get the research proven results, use the research proven amount.
Beverly International's 7-Keto MuscLean is safe, natural, and best of all...
it's guaranteed 100% effective.**

- **Clinical tests indicate 7-Keto is remarkably effective for fat loss.**
- **MuscLean combines 7-Keto with compounds that support metabolism fat burning.**
- **MuscLean combined with exercise & nutrition results in maximum decreases in total body fat.**
- **7-Keto MuscLean is natural, it's safe, it works, and... it's backed by science.**

Take three **7-Keto** MuscLean capsules, twice daily and you'll get the full research-proven 200 mg. dose. That's why **7-Keto** MuscLean is unconditionally guaranteed to work for you!

Don't settle for a sluggish metabolism. Let MuscLean trigger your body to burn that stubborn fat. Call 800-781-3475 to try the finest 7-Keto formula on earth! You may also want to read about Beverly's Other Fat Loss and Lean Mass Retention Formulas: Lean Out - Energy Reserve – Muscularity.

**Look What's Inside
7-Keto™ MuscLEAN**

Supplement Facts:
Container Size: 60 Capsules
Serving Size: 3 Capsules
Servings Per Container: 30

Amount Per Serving:

Niacin	20mg
7-Keto™	100mg
(3-Acetyl - 7- oxo- dehydroepiandrosterone)	
Green Tea Extract (Camellia sinensis) (Standardized for 20% alkaloids as caffeine)	500mg
Guarana Extract (Paulina cupana)(seed) (Standardized for 22% alkaloids as caffeine)	500mg
Hoodia Gordonii (Powder)	120mg
Bromelain 2400 gdu	45mg
Grapefruit Extract (4:1) (Concentrate)	45mg

Suggested Use
General weight loss:
 Take 3 capsules, once or twice per day. Start by taking 2 capsules in the morning upon arising and 1 capsule mid afternoon. Many get the results they want on just three capsules daily.

Research proven protocol for maximum fat loss:
 Take 3 capsules twice daily. Do not exceed 6 capsules per day.

Consult with a healthcare practitioner prior to use if you have any pre-existing medical conditions, including high blood pressure, heart or thyroid problems, nervous disorders, diabetes, or are taking any prescription drug. Do not use if pregnant or lactating.

Warning: Grapefruit has potential reactions with certain medications. Please check with your physician or pharmacist for any contraindications before using 7-Keto MuscLEAN.
